

# Alpha 24/110 III

Product code: 48624110

Delivery includes Alpha Pro III charge regulator.

- Fast & complete charging of starter and service batteries.
- Power supply for all consumers.
- 12 V and 24 V versions.
- 75 A to 150 A charge current.
- Standard delivered with Alpha Pro III charge regulator for an optimal performance and longer-lasting batteries.

Using a Battery Mate or battery isolator in conjunction with an Alpha alternator makes it possible to easily charge two or three separate battery sets simultaneously.

TIP: A second alternator on the main engine, combined with a larger battery bank and inverter, could be an alternative for a generator.

### **For all engine types**

Alpha alternators are equipped with several fixations for customised alternator brackets, available from your installer or engine supplier. Some engine brands come with Mastervolt alternator brackets as an option.

### **Fast charging, even at a stationary rpm**

Standard alternators only supply the specified capacity at a high rpm. The Mastervolt Alpha alternator is specifically designed for powerful charging, even with a low engine rpm.

### **Multigroove pulley**

The 12/130 and 24/75 models are also available with a multigroove pulley.

### **Performs above 40 °C**

Forced cooling by fan operation of the pulley provides a lot of power in higher temperatures, especially close to the engine.

# Specifications

## General specifications

|                      |   |
|----------------------|---|
| Charge regulation    | an Alpha Pro III regulator comes standard with all models |
| Total charge current | 110 A   |
| Belt section         | 2xA   |
| Isolated operation   | yes   |
| Rotational direction | 2   |
| Mounting             | six o'clock   |
| Dimensions           | see 'Downloads' for drawings                              |
| Weight               | 10.1 kg<br>22.3 lb  |

## Technical specifications

|                           |                   |
|---------------------------|-------------------|
| Charge voltage Absorption | 28.5 V            |
| Charge voltage Float      | 26.5 V            |
| Nominal diameter pulley   | 89 mm<br>3.5 inch |
